

Dear Principal Investigators:

I would like to let you know the Clinical Chemistry Laboratory at DFCI will start testing for folate, ferritin and vitamin B₁₂ on 11/21/07. Specimens will no longer be sent to Quest Diagnostics. While we are achieving significant savings, we are aware of the fact that any transition in send-out testing could affect ongoing clinical trials that utilize Quest Diagnostics. Please let me know if you have any concerns related to the transition.

Thank you.

Petr Jarolim, MD, PhD, Medical Director, Clinical Chemistry and Laboratory Control, Dana Farber Cancer Institute and Brigham and Women's Hospital, Phone 617-732-6672, BWH pager 17196.
