MAC Transition Projects

For DF/HCC Members

Transition Projects Description	DF/HCC Price	Comments
Cell master or working bank	\$ 1,200.00	36 vials
Subcloning and related services		
Subcloning per parental hybridoma	\$ 250.00	2 vials/hybridoma
Cryopreservation	\$ 55.00	
Thawing & expansion of hybridomas	\$ 55.00	
Isotyping of antibody	\$ 30.00	
Adaptation of clone to serum-free media	\$ 80.00	
Hybridoma Productivity Assay	\$ 75.00	
Mycoplasma testing of hybridomas or other cell lines	\$ 85.00	
Screens for sera testing, fusions and clones		
Western Blot	\$ 120.00	per gel run/blot
Direct ELISA	\$ 100.00	per plate set up
Sandwich ELISA	\$ 150.00	per plate set up
IHC (immunohistochemistry)	\$ 350.00	per plate, set of 8 slides, 20 Abs
IF (immunofluorescence)	\$ 350.00	per plate or set of 8 slides
Flow Cytometry	\$ 350.00	per plate
Antibody production		
Up to 50 mL	\$ 50.00	
Between 0.5 and 1 L	\$ 800.00	
Integra flask	\$ 1,200.00	
Antibody purification		
Up to 500 mL	\$ 525.00	
Between 0.5 and 1 L	\$ 725.00	
Between 1 and 5 L	\$ 1,300.00	
Between 5 and 10L	\$ 2,500.00
