

**DANA-FARBER / HARVARD CANCER CENTER  
POLICIES FOR HUMAN SUBJECT RESEARCH**

<b>TITLE:</b> Responsibilities of Investigators		
<b>POLICY #:</b> RCO-102	<b>Page:</b> 1 of 8	<b>Effective Date:</b> 1/31/18

**1. POLICY STATEMENT:**

A system using an Overall Principal Investigator (PI), site responsible investigator and subinvestigator is utilized for the conduct of DF/HCC research. The Overall Principal Investigator has the ultimate responsibility for the conduct of the research under his or her name, including subject safety, the integrity and validity of the data, delegation of research responsibilities and personal supervision of the research team.

**2. BACKGROUND:**

The Principal Investigator is fully responsible for protocols conducted under his or her name as set out for example on the Form FDA 1572, in Investigator Agreements, and on Institutional Review Board (IRB) approved protocols. This responsibility includes the protection of human subjects as documented in medical records and research charts; ensuring the research is conducted in accordance with federal, state, and local laws and regulations, institutional policies, protocol requirements and IRB determinations; and accountability for events of data collection that can be reconstructed from source data to demonstrate subjects participated in the research and efficacy/safety parameters support the data collected.

**3. RESPONSIBLE PERSONNEL:**

- 3.1. Overall Principal Investigator (PI)
- 3.2. Site Responsible Investigator
- 3.3. Subinvestigator

**4. DEFINITIONS:**

- 4.1. **Investigator (Overall Principal Investigator):** An individual who actually conducts the research. In the event the research is conducted by a team of individuals, the investigator is the responsible leader of the team. For the research for which they are the Principal Investigator of the overall research project, this applies to all sites at which the research is conducted. For the research for which they are not the Principal Investigator of the overall research project but are the DF/HCC Overall Principal Investigator, this applies to all sites within DF/HCC.
- 4.2. **Site Responsible Investigator:** An individual located at a specific DF/HCC site and designated by the Overall PI to assist with the conduct of the research at that site.

**DANA-FARBER / HARVARD CANCER CENTER  
POLICIES FOR HUMAN SUBJECT RESEARCH**

**TITLE:** Responsibilities of Investigators

**POLICY #:** RCO-102

**Page:** 2 of 8

**Effective Date:** 1/31/18

- 4.3. **Sponsor:** The individual, pharmaceutical company, government agency, academic institution, private organization, or any other organization who takes responsibility for and initiates the research. The sponsor does not have to actually conduct the research.
- 4.4. **Subinvestigator:** Any other member of the research team who will make clinical decisions during the research or make a direct and significant contribution to the data. The International Conference on Harmonisation (ICH) Good Clinical Practice (GCP) guidelines define subinvestigator as “any individual member of the clinical trial team designated and supervised by the investigator to perform critical trial-related procedures and/or to make important trial-related decisions”.

**5. POLICY:**

- 5.1. This policy applies to both clinical and non-clinical research. Specific requirements apply as applicable. For example, references to requirements relating to drugs will not apply to research where no drug is involved.
- 5.2. Investigators involved in the conduct of National Cancer Institute (NCI) sponsored or funded research must register with the NCI and renew their registration annually.
- 5.3. Qualifications for Overall PI, Site Responsible Investigator and Subinvestigator Designation
- 5.3.1. The following individuals may serve as Overall PI:
- 5.3.1.1. Active faculty members with privileges at a DF/HCC institution
  - 5.3.1.2. For research deemed minimal risk by the IRB
    - 5.3.1.2.1. Faculty members without a medical license or privileges at a DF/HCC institution
    - 5.3.1.2.2. Nurse researchers with the endorsement of the respective institutional nursing department
    - 5.3.1.2.3. Trainees and other non-faculty research personnel with the inclusion of a faculty mentor.
- 5.3.2. The following individuals may serve as Site Responsible Investigator:

5.3.2.1. Active faculty members with privileges at a DF/HCC institution

5.3.2.2. For research deemed minimal risk by the IRB

5.3.2.2.1. Faculty members without medical licenses or privileges at a DF/HCC institution and nurse researchers, trainees or other non-faculty research personnel

5.3.3. The following individuals may serve as Subinvestigator:

5.3.4. Active faculty members with privileges at a DF/HCC institution

5.3.5. Trainees or non-faculty staff affiliated with a DF/HCC institution who will be directly involved in the performance of procedures required by the protocol or the collection of data

5.3.6. Other individuals if they will make a significant intellectual or scientific contribution to the development and/or conduct of the research.

5.4. Responsibilities of the Overall PI

5.4.1. The Overall PI assumes the responsibility for the conduct of the research and must personally oversee the conduct of the research ensuring that it complies with applicable regulations and institutional policies. These responsibilities include:

5.4.1.1. Conducting research according to the signed investigator agreement, the research plan and/or protocol, and applicable regulations and IRB policies.

5.4.1.2. When applicable, ensuring that all medical decisions and activities are performed by an individual qualified according to state and local regulatory and licensure requirements.

5.4.1.3. When applicable, ensuring access to appropriate medical care for any research related injuries, during and following a subject's participation.

5.4.1.4. Ensuring no changes to the current written approved protocol are made unless previously approved by the IRB and the sponsor of the research or as necessary to protect the rights, safety or welfare of subjects as defined by IRB policy.

- 5.4.1.5. Obtaining and documenting the effective informed consent of the subject or the subject's legally authorized representative (LAR) prior to altering an individual's care for the purposes of research or initiating any research specific procedures and keeping the subject or their LAR informed of any new information which may affect their continued willingness to participate.
  - 5.4.1.6. Completing and submitting reports as required by the protocol, regulations, IRB and/or sponsor or funding agency. Specifically reporting adverse events, all unanticipated problems involving risk to subjects or others, as well as any changes in the IRB approved protocol.
  - 5.4.1.7. Recruiting subjects in a fair and equitable manner, weighing the potential risks and vulnerability of the subjects with the potential benefits of the research.
  - 5.4.1.8. Ensuring financial disclosure is provided for each research team member contributing data and performing protocol assessments.
  - 5.4.1.9. Controlling the use of any investigational or commercially available product, biologic or test article including maintaining adequate records of the use, disposition and storage of the product in compliance with applicable federal laws and institutional policies. Retaining records required for drug or device research in accordance with federal regulations and DF/HCC policy.
  - 5.4.1.10. Ensuring that subject records and documentation are compiled, maintained and held in accordance with the research protocol, applicable regulations, institutional and DF/HCC policies, privacy laws, and that research documentation and records are available for inspection or audit.
- 5.4.2. The Overall PI may have additional responsibilities based on the nature of the research. These may include but are not limited to:
- 5.4.2.1. Sponsor responsibilities for the research where he or she is also the research sponsor (e.g., IND or IDE holder, PI-initiated research, multi-center research)
  - 5.4.2.2. Registration and subsequent research results reporting for FDA-regulated research to ClinicalTrials.gov

<b>POLICY #:</b> RCO-102	<b>Page:</b> 5 of 8	<b>Effective Date:</b> 1/31/18

- 5.4.2.3. Submission of final peer-reviewed journal manuscripts that arise from National Institutes of Health (NIH) funds to digital archive PubMed Central upon acceptance for publication
- 5.4.2.4. For Research Funded by the Department of Defense(DoD): The Principal Investigator is responsible for ensuring that all obligations for the research are fulfilled as required by the specific DoD Component.
- 5.4.2.5. For general information on meeting these requirements, please refer to the OHRS Information Sheet, "Research Funded or Supported by the Department of Defense." Additional information regarding the specific requirements of the DoD Component should be obtained directly from the granting agency.
- 5.4.3. The Overall PI may choose to delegate significant research-related duties. Delegation of duties does not negate nor replace the obligations and responsibilities of the Overall PI who remains personally responsible for all research conduct. When delegating duties to others, the Overall PI must ensure that:
- 5.4.3.1. Designated individuals are qualified to perform such tasks.
- 5.4.3.2. All research personnel, including experienced individuals and replacement staff, receive training on how to conduct the delegated duties and are provided with an understanding of the research.
- 5.4.3.3. There is adequate supervision and involvement in the ongoing conduct of the research.
- 5.4.3.4. These primary responsibilities are not delegated.
- 5.4.4. The Overall PI must develop a written supervisory plan for each new clinical and non-clinical project application submitted on or after September 17, 2012, regardless of the research sponsor. The plan must be in place prior to the first subject accrual. The initial plan and any prospective changes to the plan must be maintained in the regulatory files. These documents are not subject to IRB review or approval. The supervisory plan must include the following eleven elements, to the extent they apply to the research:
- 5.4.4.1. Routine joint meetings (these can occur by telephone, video, or web conferencing) with site responsible investigators across all DF/HCC sites to review research progress, adverse events, changes to the

protocol or other procedures, issues with subject or staff compliance. The date, content, and attendees for these meetings must be recorded. Meetings will generally occur every 1-4 months, depending on the nature of the research, in order to ensure that the Overall PI is aware in a timely manner of toxicities, dose modifications, serious adverse events, and outcomes data at all sites participating in the research.

5.4.4.2. Routine meetings with the sponsor's monitors

5.4.4.3. A procedure for the timely correction and documentation of problems identified by research personnel, outside monitors or auditors, or other parties involved in the conduct of the research

5.4.4.4. A procedure for documenting or reviewing the performance of delegated tasks in a satisfactory and timely manner and, where appropriate, verifying findings (e.g., observation of the performance of selected assessments or independent verification by repeating selected assessments)

5.4.4.5. A procedure for ensuring that source data are accurate, contemporaneous (i.e., documented in real time), and original

5.4.4.6. A procedure for ensuring that information in source documents is accurately captured on the data collection forms, case report forms (CRFs), or elsewhere as appropriate for the research

5.4.4.7. A procedure for dealing with data queries and discrepancies identified by the research monitor or other individuals responsible for oversight for the research

5.4.4.8. Procedures for ensuring research personnel comply with the IRB-approved protocol and all adverse event assessment and reporting requirements

5.4.5. The Overall PI will establish a regular review schedule, commensurate with the subject population and the nature of the research, to review related reports, decisions and documentation verifying actions taken for those duties that have been delegated. Review activities must be documented.

5.5. Responsibilities of a Site Responsible Investigator

5.5.1. A Site Responsible Investigator assumes delegated responsibilities that are limited to his or her institution. These responsibilities include:

POLICIES FOR HUMAN SUBJECT RESEARCH**

<b>TITLE:</b> Responsibilities of Investigators		
<b>POLICY #:</b> RCO-102	<b>Page:</b> 7 of 8	<b>Effective Date:</b> 1/31/18

5.5.1.1. Assuming all of the responsibilities outlined in section 5.3.1 for his or her institution

5.5.1.2. Promptly communicating information relevant to the conduct of the research to the Overall PI

5.5.1.3. Participating in the joint research meetings scheduled by the Overall PI. When it is not possible for him or her to participate in the meeting, he or she will ensure that a delegate is able to participate.

5.5.1.4. Coordinating routine meetings with research personnel within the Site Responsible Investigator's institution. Content will focus on safety and compliance topics (e.g., research progress, adverse events, changes to the protocol or other procedures, issues with subject or staff compliance, etc.). The date, content, and attendees for these meetings must be documented. Meetings will occur every 1-4 months, depending on the nature of the research, in order to ensure that the Site Responsible Investigator is aware in a timely manner of toxicities, dose modifications, serious adverse events, and outcomes for subjects enrolled at his or her institution.

5.5.1.5. The Site Responsible Investigator will ensure that minutes from these institution-specific meetings are recorded, and a copy is forwarded to the Overall PI in a timely manner.

5.6. Responsibilities of a Subinvestigator

5.6.1. Subinvestigators assume delegated responsibility for the daily conduct of the research. These responsibilities include:

5.6.1.1. If applicable, maintaining license in the state for which they are enrolling subjects and/or credentials in the institution where the research is conducted.

5.6.1.2. Adhering to the IRB-approved protocol unless immediate actions are necessary to protect the rights, safety or welfare of subjects.

5.6.1.3. If applicable, obtaining and documenting the effective informed consent of the subject or LAR prior to altering an individual's care for the purposes of research or initiating any research specific procedures

and keeping the subject or their LAR informed of any new information which may affect their continued willingness to participate.

5.6.1.4. Promptly informing the Site Responsible Investigator and the Overall PI of adverse events and unanticipated problems involving risk to subjects or others during the course of the research.

**6. APPLICABLE REGULATIONS & GUIDELINES:**

- 21 CFR 50 – Protection of Human Research Subjects
- 21 CFR 54 – Financial Disclosure by Clinical Investigators
- 21 CFR 56 – Institutional Review Boards
- 21 CFR 312 - Investigational New Drugs – Drugs for Human Use
- 21 CFR 812 - Investigational Device Exemptions
- 45 CFR 46 – Protection of Human Subjects
- FDA Industry Guidelines and Information Sheets
- FDA Compliance Policy Guidance Programs: 7348.809, 7348.810, and 7348.811
- Form FDA 1572 located at CDER forms
