

Agency	Policy/Link	Topic	Summary
MA Dept of Public Health	Conduct of Human Subject Research v.4/15/2013	References OHRP/FDA regs	policy applies to all research involving human subjects in which an MDPH employee or agent is engaged, consistent with guidance from OHRP.
MA Health and Human Services	Protection of Human Research Subjects Requirements	access to confidential MDPH records	Provides recruitment letter and consent requirements for access to confidential MDPH records; contact will be initiated by the department, not by the investigator.
MA Health and Human Services	Data Access	MDPH confidential information for research	MDPH confidential information for research must have approval from the Commissioner of Public Health;
Stem Cell Research: http://www.mass.gov/eohhs/gov/departments/dph/programs/hcq/healthcare-quality/stem-cell-research/			
MA Health and Human Services	Application for Certificate of Registration to Conduct Human Embryonic Stem Cell Research	Human Embryonic Stem Cell Research Institutional Registration	"Biotechnology", requires any institution that conducts human embryonic stem cell research in Massachusetts to obtain a Certificate of Registration from the Department of Public Health.
MA Health and Human Services	Instructions for Annual Reports from Institutions Holding a Certificate of Registration	Annual Reporting for Human Embryonic Stem Cell Research	Due by January 31 for the 1-year period from January 1 – December 31 of the reporting year, Annual reports should provide a summary of the research approved to the extent required by M.G.L. c. 111L, § 3(b). The report should also include a statement representing that said research was reviewed in accordance with M.G.L. c. 111L, if applicable.
MA Health and Human Services	Electronic Transmission of Correspondence – Listserv	Human Embryonic Stem Cell Research – notifications	Institutions should subscribe to the listserv to obtain important information re: stem cell research

		review of research – guidelines for investigators; <i>includes protocol and consent form templates, as well as the following 4 forms as appendices.</i>	Central Office Research Review Committee 2 (a) A DMH employee, as an employee, participates as a research investigator or a subject; (b) A DMH client is a subject of the research, unless the research in no way is related to DMH, or a facility or program operated or contracted for by DMH; (c) The research involves disclosure of data by DMH; or (d) The terms of an agreement or other regulations require CORRC review.
MA Department of Mental Health	Periodic Review Form	Continuing Review	At least annual monitoring (continuing review) submission form.
MA Department of Mental Health	Guidelines for reporting Adverse Events	AE reporting	A Serious Adverse Event must be reported verbally as soon as it is reasonably possible and in writing by the next business day following the Event.; A summation of all Adverse Events that do not qualify as Serious Adverse Events must be provided to the Chair of the Committee by the Principal Investigator every four (4) months, or as otherwise determined appropriate by the Department Research Review Committee.
MA Department of Mental Health	Serious Adverse Event Form		
MA Department of Mental Health	Unaffiliated Research Investigator Agreement Form	Form	Required for investigators who are not DMH employees
MA State Law			
MGL Chapter 112, Section 12J	Experimentation on human fetuses prohibited; medical procedures authorized; consent; approval; civil and criminal liability and proceedings; severability	Fetus/Fetal tissue Research	No person shall use any live human fetus whether before or after expulsion from its mother's womb, for scientific, laboratory, research or other experimentation. This section shall not prohibit procedures incident to the study of a human fetus while it is in its mother's womb or a neonate; provided that in the best medical judgment of the physician, made at the time of the study, the procedures do not substantially jeopardize the life or health of the fetus or neonate; and provided further that, in the case of a fetus, the fetus is not

Partners	Partners Vulnerable Populations Submission Form	Vulnerable Populations/Children	<p>Consistent with Massachusetts State Law that allows persons who have attained the age of 18 to consent to treatment or procedures, the PHRC defines children as persons under the age of 18. The PHRC notes, however, that certain statutes and case law provide children with majority status for medical decision-making in some circumstances, for example: emancipated minor; mature minor; or minor seeking care for drug addiction, sexually</p>

			<p>transmitted diseases, emotional disorders, or abortion.</p> <p>Because Massachusetts law and the applicable Partners-affiliated entities' policies do not specifically address consent of children with majority status to research, the PHRC will review issues of consent related to the enrollment of children with majority status on a case-by-case basis.</p>
Harvard CUHS	Vulnerable Populations - MA State Law (section 10.1.2)	Children (definitions)	<p>Age of majority. Eighteen is the age of majority both in Massachusetts (M.G.L. c. 231, § 85P) and under federal policy. When a person turns 18, s/he is considered to be an adult under the law.</p> <p>Massachusetts law recognizes two instances when teenagers under the age of 18 may have the legal capacity to consent to medical treatment. These are the emancipated minor and mature minor rules. Note that these rules concern individuals in their capacity as patients, not as subjects in research, and also that they apply only to persons in Massachusetts. These rules would not apply, for example, to research subjects living in a foreign country, although that country might have analogous rules</p>
Harvard CUHS	Vulnerable Populations MA State Law (section 10.4)	Persons with Impaired Decision Making Capacity or Mental Disabilities	<p>The federal regulations define “legally authorized representative” as “an individual or judicial or other body authorized under applicable law to consent on behalf of a prospective subject to the subject's participation in the procedure(s) involved in the research.”</p> <p>5 Under Massachusetts law, this means the consent must come either from the legal guardian of the subject, or, in the case of research that is part of medical treatment, from the subject's health care agent (either as appointed under the Massachusetts health care proxy law, or as designated by a health</p>

			<p>care provider under the common law for obtaining consent to the provision of medical care and associated procedures). If the subject is able to give assent (affirmative agreement) as well, this is required but the CUHS may waive the requirement to seek assent if the subject is not competent to give it.</p> <p>The Office of General Counsel will be consulted for each study involving adults unable to consent in Massachusetts for a determination of which individuals are legally authorized representatives under Massachusetts law to consent on behalf of subjects to their participation in the procedures involved in the research.</p>
<p>NATIONAL CANCER INSTITUTE CANCER DIAGNOSIS PROGRAM</p>	<p>50-State Survey of Laws Regulating the Collection, Storage, and Use of Human Tissue Specimens and Associated Data for Research</p>	<p>MA law begins on pdf page 54, slide 48 (most of this is already mentioned in links above)</p>	<p>Confidentiality of Health Information ■ Patients have a right to confidentiality of all records and communication. 48 [Massachusetts General Laws Annotated Chapter 111, 70E]. ■ Individuals have a general right of privacy [Massachusetts General Laws Annotated Chapter 214, 1(B)]. This privacy right also covers the confidentiality of medical information. Conditions Imposed on Genetic Testing/Use of Genetic information ■ Prior written informed consent is required for genetic testing. Genetic information and reports are protected as private information; prior written consent is required for genetic testing. Records pertaining to genetic information shall be kept confidential except that research information may be used for epidemiological or clinical research conducted for the purpose of generating scientific knowledge about genes or learning about the genetic basis of disease or for developing pharmaceutical and other treatments of disease. [Massachusetts General Laws Annotated Title 16, Chapter 22, Section 70G. Genetic information and reports protected as private</p>
